Use-Case Name: 1.2 Mark student as late

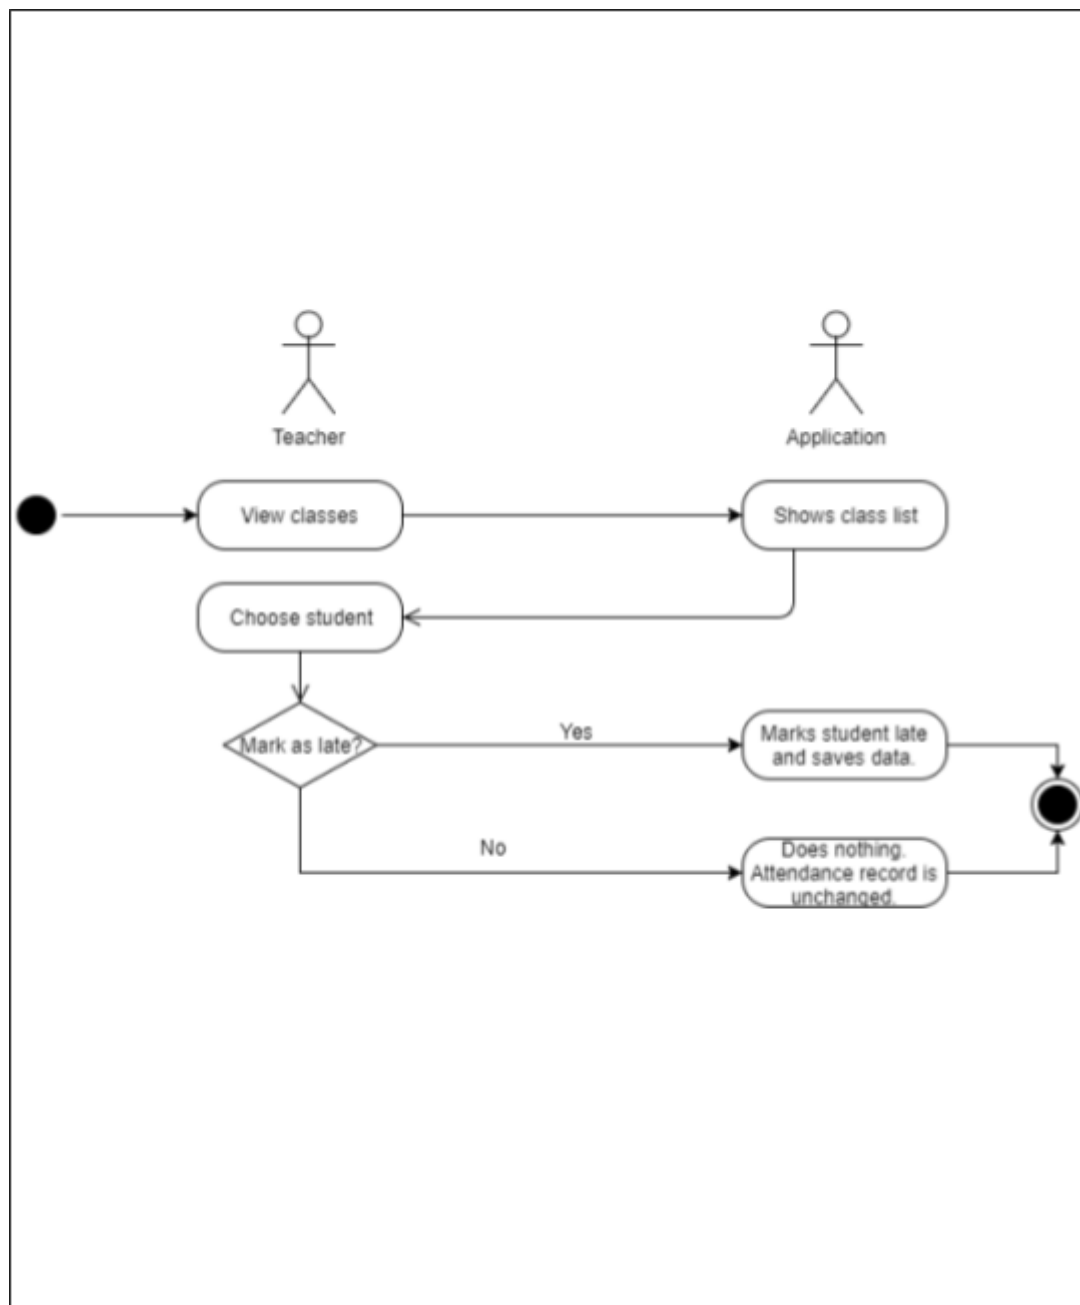

Description: This use-case marks the student's attendance record as late for a given day.

Preconditions: There must be an existing class with students enrolled in it.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The teacher marks the student as late	1. Teacher chooses a class from the list of classes. 2. Teacher chooses student from the class. 3. Teacher marks the student late. 4. System marks the student late and saves the data.
Scenario 2 The teacher cancels the action of marking the student as late	1. Teacher chooses a class from the list of classes. 2. Teacher chooses student from the class. 3. Teacher decides to cancel the action. 4. Teacher does not mark the student late and therefore, the student is marked present as default. 5. System does nothing.

Activity Diagram of the Flow of Events:

Postcondition: The student is marked either late or present.

Relationships: This use-case extends “1.0 Manage Attendance Records” and includes the use-case “1.5 View class attendance”. That is to say, whenever marking someone late, the teacher needs to view the class attendance.

Special Requirements: NONE
