

TEAM PERFORMANCE ASSESSMENT

This Team Performance Assessment is designed to create an objective discussion about team performance during the course of doing the artifacts in CS 191 Software Engineering 1. It helps team members work out how well they are working at the moment and identify the areas they want to address to help them perform better in the implementation, test and release of the software (CS 192 Software Engineering 2).

This assessment has four areas of concentration in terms of team performance, namely,:

Purpose and Shared Direction. A team that has a shared understanding of what they are trying to achieve, why and what success looks like, produces best outcomes. They show the way and model right behaviors- both in terms of direction and how people behave and work together.

Result-oriented. A team pays attention to the things that matter and their proper direction. They make tough calls and consciously divide their time and stay focused on their joint goals.

Joint Accountability. A team's members take responsibility for their own part in delivering the team's goals and helping others to achieve them. Failing to deliver or letting others down is not OK.

Team relationships. Everyone treats each other with respect, is open on uncomfortable issues and takes time to understand others' needs. It's OK to admit mistakes and weaknesses.

INSTRUCTIONS:

- 1.) Use the descriptions below to score your personal assessment of the way that your team worked together. For each statement, give a rating from 0 to 4.
- 2.) Share your individual assessment with other team member to come up with an overall team assessment, calculating the average score for each category.
- 3.) The team should reflect on the results and develop an action plan to improve overall effectiveness in working together in the implementation and testing phase.

PART 2: GROUP REVIEW

From the 3 important statements of each individual assessment, discuss and agree with your teammates the three (3) most important statement to your team. Write them down.

1	We accept and use the team member's different experiences, skills and gifts.
2	We make the tough calls about priorities.
3	We do what we say we will do.

From the 3 lowest scored statements of each individual assessment, discuss and agree with your teammates the three (3) lowest statement of your team. Write them down.

1	We divide our time well to accomplish team goals.
2	We share unspoken reservations or unexpressed feelings about the team and its issue.
3	We trust and are open with each other.

Decide as a team the level of strenght the team has for each area of team effectiveness. Place a check mark at the appropriate level of strenght.

Having reviewed your groups answers and data, reflect and write down the team's thoughts in response to the following questions:

<p>What are the key strengths of the team that you want to acknowledge and build upon?</p> <ul style="list-style-type: none">- we were able to do all the tasks (even beyond) that were assigned to us- we were able to assign tasks to every team member efficiently and appropriately.- we now have a better understanding of the Android framework	<p>Why is this important?</p> <ul style="list-style-type: none">- we became accountable to the tasks assigned and each expects to finish it- there were less struggles in the execution of the tasks- it makes the integration process easier
<p>What are the key areas you does the team want to focus to enhance the performance of the team?</p> <ul style="list-style-type: none">- time management	<p>Why is this important?</p> <ul style="list-style-type: none">- to have more time to integrate the code and do the documentation

Where will the team start?

The team shall decide on the final behavior of the functionalities and the final layout of the application.

Enhancing team performance can take time- often there's a mix of changing what you do and how you do it. Look at the key areas for your team. What concrete steps will help the team move forward to CS 192 Software Engineering?

- design a better GUI
- better error display

Previous Velocity: 107

Current Velocity: 73

What can the group say about the group's performance based on the team's velocity? Will you increase or decrease your velocity? Why?

There is a decrease in velocity in this sprint since the previous sprint required more tasks to establish the application and the initial data needed. In the next sprint, the team will be increasing in velocity since the main functionalities of the application will be developed.
